Overview

Volumetric Absorption: The Core of Intrinsic Safety

The VenusLab VLSG Series is professional protective gear engineered for precision optical laboratories and high-intensity industrial laser environments. Unlike traditional surface-coated reflective eyewear, the VLSG Series adopts advanced **Volumetric Absorption Technology**.

Specific wavelength absorbers are compounded with high-quality Polycarbonate (PC) substrates during the molding process, dispersing protective agents throughout the entire lens matrix. This **"Intrinsic Safety"** design ensures the most reliable vision protection for both scientific research and industrial production.

Typical Applications

- Laser Marking & Cutting,
- Optical Alignment
- Laser Dermatology/Medical
- Fiber Optic Research

Compliance

Strictly compliant with international laser safety standards (CE / EN207). Every pair of VLSG eyewear undergoes rigorous Optical Density testing, ensuring trustworthy performance.
